Build a food delivery app from login to live tracking

A complete Swiggy-style food delivery app, built live over 16 sessions: login, restaurants and menus, cart, maps, payments and live order tracking. For students who know Flutter basics.

16 live sessions | 8 weekends | 2 hrs each | Real app

16
live sessions over 8 weekends

32 hrs
hands-on, instructor-led

1
complete app you build and own

8
modules, from setup to launch

WHY THIS COURSE

Small demos teach widgets. A full app teaches you to ship.

Most courses stop at a few screens. Real apps need login, live data, a cart, maps, payments and notifications working together. In this course you build all of it, one module at a time, with a working engineer guiding every step, and finish with an app that looks and works like the ones you use every day.

Learning alone from tutorials	This course
✕ A few screens with dummy data	✓ A complete app, end to end
✕ No login or real database	✓ Phone login and Firebase data
✕ Payments and maps skipped	✓ Google Maps and Razorpay test checkout
✕ Nothing to show recruiters	✓ A portfolio project on your GitHub

WHO IT'S FOR

✓ **You know Flutter basics**
You can build simple screens and want to build a complete, real app.

✓ **You want a big portfolio project**
A food delivery app shows almost every skill companies ask for.

✓ **You finished Flutter in 10 Days**
This takes you from your first app to a production-style one.

✓ **You're preparing for jobs**
Firebase, maps, payments and notifications are common interview topics.

WHAT YOU TAKE HOME

01
Your app
A complete food delivery app on your phone.

02
GitHub portfolio
Clean code to show recruiters.

03
Demo day
Present your app at the end.

04
Real-world skills
Auth, maps, payments and push.

SYLLABUS

Eight modules, one app

Two live sessions per module, 2 hours each. Every module adds a real feature to the same app.

#	TITLE	WHEN	OUTCOME
M1	**App setup & design**	Sessions 01–02 · 4 hrs	A styled app with reusable building blocks.
M2	**OTP login**	Sessions 03–04 · 4 hrs	Users can sign in with their phone number.
M3	**Restaurants & menus**	Sessions 05–06 · 4 hrs	Browse, search and filter restaurants.
M4	**Cart & state**	Sessions 07–08 · 4 hrs	A working cart with correct prices.
M5	**Location & maps**	Sessions 09–10 · 4 hrs	Users can choose where to deliver.
M6	**Payments & orders**	Sessions 11–12 · 4 hrs	Orders placed with a test payment.
M7	**Live order tracking**	Sessions 13–14 · 4 hrs	Users see their order move in real time.
M8	**Testing & launch**	Sessions 15–16 · 4 hrs	A finished app on your phone and your GitHub.

TOOLS & PACKAGES

Flutter · Dart · Firebase · Google Maps · Razorpay · Push notifications · Git

M1 App setup & design

Sessions 01-02 · 4 hrs

TOPICS COVERED

1. Real app screens
2. Theme
3. Reusable widgets

HANDS-ON LAB

Set up the project and build the main screens.

OUTCOME

A styled app with reusable building blocks.

M2 OTP login

Sessions 03-04 · 4 hrs

TOPICS COVERED

1. Phone sign-in with Firebase
2. User profiles

HANDS-ON LAB

Add phone login and a profile screen.

OUTCOME

Users can sign in with their phone number.

M3 Restaurants & menus

Sessions 05-06 · 4 hrs

TOPICS COVERED

1. Live data
2. Search
3. Filters
4. Images

HANDS-ON LAB

Show restaurants and menus from live data.

OUTCOME

Browse, search and filter restaurants.

M4 Cart & state

Sessions 07-08 · 4 hrs

TOPICS COVERED

1. State management
2. Cart logic
3. Coupons
4. Price totals

HANDS-ON LAB

Build the cart with coupons and totals.

OUTCOME

A working cart with correct prices.

M5 Location & maps

Sessions 09-10 · 4 hrs

TOPICS COVERED

1. Google Maps
2. Address picker
3. Delivery distance

HANDS-ON LAB

Add an address picker on a map.

OUTCOME

Users can choose where to deliver.

M6 Payments & orders

Sessions 11-12 · 4 hrs

TOPICS COVERED

1. Razorpay test checkout
2. Placing orders

HANDS-ON LAB

Add checkout and place orders.

OUTCOME

Orders placed with a test payment.

M7 Live order tracking

Sessions 13-14 · 4 hrs

TOPICS COVERED

1. Real-time status updates
2. Push notifications

HANDS-ON LAB

Show live order status and send notifications.

OUTCOME

Users see their order move in real time.

M8 Testing & launch

Sessions 15-16 · 4 hrs

TOPICS COVERED

1. Release build
2. GitHub portfolio
3. Demo day

HANDS-ON LAB

Build a release APK and present your app.

OUTCOME

A finished app on your phone and your GitHub.

YOUR MENTOR

Kishan Kumar Sharma

Senior Software Engineer at Relevance Lab · MCA

Flutter developer for 5+ years. Builds production apps with Bloc, go_router and clean architecture, and has worked on large consumer apps as part of a team. Founder of Widgetry Academy.

PROGRAM DETAILS

COURSE	Food Delivery App with Flutter & Firebase
DURATION	16 live sessions, 2 hours each (32 hours), over 8 weekends
SCHEDULE	Weekends. Batch dates are shared when you register
LEVEL	For students who know Flutter basics
FORMAT	Live online, code along, questions answered in class
YOU'LL NEED	A laptop with Flutter installed, VS Code or Android Studio, and a GitHub account
FEE	₹6,999 one-time (₹8,999 regular)
REFUNDS	See widgetryacademy.in/refund.html

QUESTIONS

Frequently asked

Do I need to know Flutter already?

Yes, the basics: widgets, layouts and simple screens. New to Flutter? Start with Flutter in 10 Days.

Will I get the code?

Yes. Your app lives on your GitHub, and the reference code is shared too.

Can I get a refund?

See our refund policy at widgetryacademy.in/refund.html, or message us on WhatsApp.

Are real payments taken in the app?

No. We use Razorpay's test mode, so you can build and try checkout without real money.

How do I join the sessions?

Sessions are live online. After you pay, the joining link appears on the course page (sign in with the same account), and we share the details on WhatsApp too.

SEATS ARE LIMITED PER BATCH

Reserve your seat

1. Scan the QR code or open the link below
2. Sign in and fill in your details
3. Pay securely online. Joining details come on WhatsApp
