

Flutter + Dart · Google's open-source toolkit for Android, iOS & web

Mobile App Development with Flutter

A hands-on weekend program for students from Class 10 to graduation. Build and ship your own mobile app in 10 live sessions, mentored by a senior engineer who builds production apps.

10 live sessions

Saturdays & Sundays

No coding experience needed

Certificate

10

live sessions over 5 weekends

20 hrs

hands-on, instructor-led

1

capstone app you build & own

50M+

downloads on apps the mentor worked on

WHY THIS PROGRAM

Tutorials teach syntax. This program teaches you to ship.

Most beginners watch videos, copy code and end up with half-finished projects. In this program you learn by building, live, with a working senior engineer guiding every step. By the last session you have a real app on your phone and code you can show in interviews.

Learning alone from videos

- ✗ Copy-paste code you don't fully understand
- ✗ Stuck on setup errors with no one to ask
- ✗ Unfinished projects, nothing to show
- ✗ Outdated patterns companies don't use

Widgetry Academy program

- ✓ Live coding with a senior engineer
- ✓ Doubts solved in every session
- ✓ A finished app on your phone
- ✓ Tips and habits from real production apps

WHY FLUTTER

- ✓ **One codebase, every platform**
Build Android, iOS and web apps from the same code.
- ✓ **Created and backed by Google**
Open source, actively developed, with a large global community.
- ✓ **Used by major products**
Large-scale apps, including India's Tata Neu super app, use Flutter.
- ✓ **Beginner-friendly**
Hot reload shows every change on screen instantly.

WHO IT'S FOR

- ✓ **School students, Class 10–12**
Curious how apps are made. No coding background needed.
- ✓ **College students, any stream**
BCA, BSc, BTech, BCom and more. Build a portfolio project employers notice.
- ✓ **Recent graduates**
Add an in-demand, job-ready skill to your resume.
- ✓ **Complete beginners**
We start from zero and move at a steady, supported pace.

WHAT YOU TAKE HOME

01

Your own app

An installable Android app you built yourself.

02

GitHub portfolio

Clean, structured code to show recruiters.

03

Certificate

Certificate of completion with a unique ID.

04

Career guidance

Resume, portfolio and LinkedIn tips for app developers.

SYLLABUS

Course structure

Designed for complete beginners. The program has five modules of two sessions each. Every session is 2 hours, and most of that time is spent building, with the mentor guiding each step.

MODULE	TITLE	SESSIONS	HOURS	FOCUS
M1	Getting Started	01–02	4	Setup, first app on your phone, Dart basics
M2	Designing Screens	03–04	4	Widgets, layouts and making screens interactive
M3	Multiple Screens & Live Data	05–06	4	Lists, navigation and data from the internet
M4	Saving Data & Users	07–08	4	Forms, saving on the phone, Firebase login
M5	Finish & Share	09–10	4	Polish, build the APK, GitHub and demo day
Total		10	20	One complete app, built step by step

SESSION FORMAT

0:00 – 0:10	Quick recap and doubts
0:10 – 0:40	New concept, explained simply with live demo
0:40 – 1:45	Build it together in your own app
1:45 – 2:00	Q&A and practice task

ASSESSMENT & COMPLETION

Attendance	Attend at least 8 of 10 sessions
Practice	Try the short practice task after each session
Project	Present your app on demo day
Certificate	Issued on completing the above

YOUR PROJECT: ONE APP, BUILT STEP BY STEP

Instead of many small demos, everyone builds one real app across the 10 sessions, adding a new feature each time: designed screens, a list and detail view, live internet data, saved favourites and Firebase login. Each student personalises it with their own name, colours and content. Example themes: a movie finder, a recipe app, a college events app or a product catalogue.

AFTER THIS WORKSHOP • COMING SOON

Professional Flutter Program

For students who want to become job-ready: Bloc state management, clean architecture, offline-first apps, testing, CI/CD and publishing on Google Play.

M1

MODULE 1 OF 5 · 4 HOURS

Getting Started

SESSION 01

Setup & Your First App

Weekend 1 · Saturday · 2 hrs

TOPICS COVERED

1. What Flutter is and why apps like Tata Neu use it
2. Installing Flutter, VS Code and Android Studio (guided, step by step)
3. Creating your first project and understanding the main files
4. Running the app on an emulator and on your own Android phone
5. Hot reload: change the code and see it instantly

HANDS-ON LAB

Run a "Hello" app on your phone and change its text and colours.

ASSIGNMENT

Finish setup at home and share a screenshot of your app running.

OUTCOME

Your first app running on your own phone.

SESSION 02

Dart Basics for Flutter

Weekend 1 · Sunday · 2 hrs

TOPICS COVERED

1. Variables and data types: text, numbers, true/false
2. Making decisions with if/else
3. Lists and loops
4. Writing and calling functions
5. Classes and objects, explained with simple examples

HANDS-ON LAB

Write a small program that stores a list of students and prints their grades.

ASSIGNMENT

5 short practice exercises in DartPad (in the browser).

OUTCOME

Enough Dart to understand and write Flutter code.

TOOLS & PACKAGES

Flutter SDK

Dart

VS Code

Android Studio

DartPad

BY THE END OF THIS MODULE

Run a Flutter app on your own phone and read basic Dart code.

M2

MODULE 2 OF 5 • 4 HOURS

Designing Screens

SESSION 03

Widgets & Layouts

Weekend 2 • Saturday • 2 hrs

TOPICS COVERED

1. Everything in Flutter is a widget
2. Scaffold, AppBar, Text, Icon and Image
3. Arranging items with Row, Column and Stack
4. Spacing and styling with Container, Padding and colours
5. Using images and custom fonts

HANDS-ON LAB

Build the home screen of the app you will develop across the workshop.

ASSIGNMENT

Design a "profile card" screen about yourself.

OUTCOME

You can turn a screen design into Flutter UI.

SESSION 04

Buttons, Input & State

Weekend 2 • Sunday • 2 hrs

TOPICS COVERED

1. Stateless vs stateful widgets in simple terms
2. Buttons and responding to taps
3. Updating the screen with setState
4. Taking input with TextField
5. Showing messages with SnackBar and dialogs

HANDS-ON LAB

Add working buttons and a search box to your app.

ASSIGNMENT

Build a simple counter or tip-calculator app.

OUTCOME

Screens that react to what the user does.

TOOLS & PACKAGES

Material widgets

Images & icons

Google Fonts

Hot reload

BY THE END OF THIS MODULE

Build good-looking screens that respond to taps and typing.

M3

MODULE 3 OF 5 • 4 HOURS

Multiple Screens & Live Data

SESSION 05

Lists & Navigation

Weekend 3 • Saturday • 2 hrs

TOPICS COVERED

1. Showing many items with ListView
2. Cards and list tiles that look professional
3. Opening a new screen with Navigator
4. Sending data to the next screen
5. Going back to the previous screen

HANDS-ON LAB

Show a list of items and open a detail screen when one is tapped.

ASSIGNMENT

Add one more screen to your app (for example "About").

OUTCOME

A multi-screen app with a scrolling list.

SESSION 06

Getting Data from the Internet

Weekend 3 • Sunday • 2 hrs

TOPICS COVERED

1. What an API is, using everyday examples
2. Fetching data with the http package
3. Reading JSON and turning it into Dart objects
4. Showing a loading spinner while data arrives
5. Showing a friendly message when there is no internet

HANDS-ON LAB

Replace your sample data with real data from a free public API.

ASSIGNMENT

Show one extra piece of information from the API in your app.

OUTCOME

Your app now shows live data from the internet.

TOOLS & PACKAGES

ListView

Navigator

http package

JSON

BY THE END OF THIS MODULE

Move between screens and show real data from an API.

M4

MODULE 4 OF 5 • 4 HOURS

Saving Data & Users**SESSION 07****Forms & Saving Data**

Weekend 4 • Saturday • 2 hrs

TOPICS COVERED

1. Building a simple form
2. Checking input (empty fields, valid email)
3. Saving small data on the phone with `shared_preferences`
4. Adding a "favourites" feature
5. Loading saved data when the app opens

HANDS-ON LAB

Add favourites to your app that stay saved after you close it.

ASSIGNMENT

Add a settings option (for example, your name shown on the home screen).

OUTCOME

An app that remembers things.

SESSION 08**Firebase Login & Database**

Weekend 4 • Sunday • 2 hrs

TOPICS COVERED

1. What Firebase is and why apps use it
2. Connecting your app to Firebase (guided setup)
3. Sign up, log in and log out with email
4. Saving and reading data in Cloud Firestore
5. Showing each user their own data

HANDS-ON LAB

Add login to your app and save each user's favourites to the cloud.

ASSIGNMENT

Test your app with two different accounts.

OUTCOME

Your app has real user accounts.

TOOLS & PACKAGES

Forms

`shared_preferences`

Firebase Auth

Cloud Firestore

BY THE END OF THIS MODULE

Save data and let users sign in to your app.

M5

MODULE 5 OF 5 · 4 HOURS

Finish & Share**SESSION 09****Polish Your App**

Weekend 5 · Saturday · 2 hrs

TOPICS COVERED

1. Choosing colours and a theme for your app
2. Adding an app icon and splash screen
3. Changing the app name
4. Finding and fixing common bugs
5. Tips for good-looking, easy-to-use screens

HANDS-ON LAB

Give your app a finished, professional look.

ASSIGNMENT

Prepare 3 screenshots and a short description of your app.

OUTCOME

An app that looks ready to show people.

SESSION 10**Build, Share & Demo Day**

Weekend 5 · Sunday · 2 hrs

TOPICS COVERED

1. Building an APK you can install on any Android phone
2. Putting your code on GitHub
3. Writing a simple README with screenshots
4. How to talk about your project in interviews
5. What to learn next

HANDS-ON LAB

Install your app on your phone and share it with friends and family.

ASSIGNMENT

Present your app (3–5 minutes) on demo day.

OUTCOME

A finished app, a GitHub project and a certificate.

TOOLS & PACKAGES

Themes

App icon & splash

Release APK

Git & GitHub

BY THE END OF THIS MODULE

Turn your project into an installable app you can show anyone.

YOUR MENTOR

Kishan Kumar Sharma

Senior Software Engineer at Relevance Lab. MCA, Siliguri Institute of Technology. Leads Flutter architecture for enterprise apps and mentors engineers on his team.

B2B commerce · ★ 3.8

**Launching soon****I360 Vehicle Safety**

Enterprise fleet safety

CERTIFICATION

A certificate you can show at interviews

Awarded to every student who completes all sessions and presents their capstone app. It carries a unique ID and lists the skills you practised.

PROGRAM DETAILS

PROGRAM	Mobile App Development with Flutter
DURATION	10 live sessions over 5 weekends (20 hours)
SCHEDULE	Saturdays and Sundays, 2 hours per session
ELIGIBILITY	Class 10 students through graduates, any stream
PREREQUISITES	None. Basic computer use is enough
FORMAT	Live coding, guided exercises, doubt-solving, capstone project
YOU'LL NEED	A laptop (Windows, macOS or Linux; 8 GB RAM recommended) and an Android phone if available
TOOLS YOU'LL USE	Flutter SDK, Dart, VS Code, Android Studio, Firebase, Git & GitHub
BATCH SIZE	Small batches, so every student gets individual attention
FEE & DATES	Shared after you register online

QUESTIONS

Frequently asked

I've never written code. Can I join?

Yes. The first two sessions cover setup and Dart from the very beginning.

What if I miss a session?

You'll get help catching up before the next class so you don't fall behind.

How does this help my career?

You leave with a real project on GitHub, a certificate and guidance on presenting both to recruiters.

Why learn from a working engineer?

You learn the patterns real teams use today, not outdated tutorial code.

Do I need a Mac or an iPhone?

No. Any Windows, macOS or Linux laptop works. We build and test on Android; the same code runs on iOS.

Will I really finish an app?

Yes. Every session adds a working piece, and session 10 is dedicated to polishing and presenting it.

Is it suitable alongside school or college?

Yes. Classes run only on weekends, so they don't clash with regular studies.

How do parents stay informed?

Parents can follow along with the curriculum and attend demo day to see the finished app.

SEATS ARE LIMITED PER BATCH

Reserve your seat

- 1 Scan the QR code or visit the website
- 2 Fill in your details (takes under a minute)
- 3 Receive batch dates, timing and fee on WhatsApp
